EXPERIENCE

Implementations of cutting-edge web development technologies, resulting in improved functionality, increased website visibility, and a more appealing user experience.

Efficient creation and deployment of servers for optimal performance and a balanced blend of functionality and aesthetics.

Strategic planning and structuring of projects, ensuring seamless execution and successful outcomes.

Meticulous approach to project planning, considering development aspects and user requirements for efficient and well-structured solutions.

SKILLS

- JavaScript | HTML | CSS
- Node.js | Express | React | MongoDB | Mongoose | GraphQL | Git&GitHub
- Self-study aptitude | Team collaboration | Interpersonal skills | Problem-solving expertise.

ABOUT

I am Avraham Sason, a passionate full stack developer and learner, driven by my passion for constant growth and aspiration to excel in full stack development. I am looking for a home to flourish, learn new things and contribute and improve my skills while making a positive and meaningful impact.

EDUCATION

- Website and software development skills acquired from the Working Academy 2022-2023.
- Proficient in independent exploration of various technologies and current development methods.

PROJECTS

WEATHER SITE

<https://avi-wethaer.netlify.app>

A full-featured weather website providing worldwide forecasts and real-time location-based updates (subject to user-permitted access to device location).

SHOP

<https://avi-store.netlify.app>

An online store featuring diverse categories, enabling users to search, sort by price, and easily add items to their shopping cart.

OXO GAME

https://oxoavisiite.netlify.app/oxo_v2/index.html

Customizable board sizes and a generic win detection algorithm that tracks player wins and offers game save/load functionality.
